Reconciliation Leaders

...answer call for need for new leadership by Commission of Global Governance

“The world needs leaders made strong by vision, sustained by ethics, and revealed by political courage that looks to the longer term and future generations for whom the present is held in trust.”

Global problems beyond the capacity of sovereign states to solve alone are called the global problématique.
The Idea of Reconciliation

“In dealing with the challenges posed by contemporary conflict, an important meeting point between realism and innovation is the idea of reconciliation.

Reconciliation catalyzes and sustains divided societies.”

John Paul Lederach

*Sustainable Reconciliation in Divided Societies*

United States Institute of Peace Press (1997)
Three Starting Points of a Reconciliation Intervention

1. Relationship building as the focal point for both understanding the whole system and for sustained dialogue:

2. Encounter activities to express grief, loss and the anger that accompanies injustice;

3. Innovative reconciliation techniques that exist outside the mainstream.

**Relationship Building**

Reconciliation Leaders form community from all divisions and sectors of Society

Ordinary people have the potential to be Reconciliation Leaders if they are willing to claim their core gifts and talents, become aware of unconscious needs and agenda, live simply and discover their life purpose and mission.
Innovative reconciliation techniques exist outside the mainstream

- Create a shared space in which such reconnection is possible
- Creates a healing environment to address the cycle of violence

Reconciliation Leadership Offered—Our Gift to the United Nations

- We have invited people and institutions in the United Nations community and around the world to heal their own repeated internal ruptures, born of systemic unhealed historic conflict patterns and be a model of adherence to international agreements and human rights guidelines.

- We invite a multilateral approach to facilitate more equitable sharing of power and to reconcile the divisions at the individual and collective levels.
Perspectives on Sustainable Development for Global Problematique

- Challenges beyond the ability of sovereign nations to resolve individually
- Sharing needed: 1/5 people using 85% of the world’s resources.
- New leadership and cultural models needed
- Need shift from reaction to proactive response & prevention
- Understand who we are beyond our limitations

- World’s challenges need resources of diverse cultures & religions
- Inspiration by Dag Hammarskjold, 2nd UN Secretary-General: UN reform starts in the DH Mediation Room
- Understand how we can offer healing our ourselves and others for victim/perpetrator cycle of violence
Reconciliation Leaders consider lessons of 100 years of history, needs of present moment & 100 years into future.

*When Hope and History Rhyme*

> History says, don’t hope  
> On this side of the grave  
> But then, once is a lifetime  
> The longed-for tidal wave  
> Of justice can rise up  
> And hope and history rhyme

Reconciliation Leaders offer a compelling vision and broad worldview. They have the courage to refrain from advocating their own solutions to a problem, while eliciting solutions from the people who will live through those challenges.

Importance of Mission Statement

“Don't ask what the world needs. Ask what makes you come alive, and go do it. What the world needs is people who have come alive.”

Howard Thurman, Advisor to Martin Luther King

A system is an interdependent group of items forming a unified whole.
Systems thinking

- Emphasizes relationships rather than the parts themselves.
- Based on System Dynamics

- Systems thinking has a practical value that rests on a solid theoretical foundation.”

For a system to respond effectively to crises, the stresses on the system must not exceed its strengths.

Dr. Kenneth Boulding, Economist
"When I circled the planet again and again, I experienced different people, different cultures, vastly different experiences and origins. Yet there is a golden thread that runs through all these expressions of individual experience that is the magic of life." John Glenn
Imaging for Reconciliation Leadership

- The late Dr. Elise Boulding, (Nobel Peace Prize nominee) and Warren Ziegler created an imaging workshop to motivate behavior in the present by using images of the future.

- Their theory is that the people will not be able to create something they haven’t envisioned.

- As people imagine a positive future, they then can work back into present time to achieve a positive present with a timeline and concrete action steps.

- Dr. Boulding believed that if we can image a solution to a challenge, the solution will happen after we get practical with a timeline and action steps.

- Virginia Swain was mentored and trained by Dr. Boulding to lead imaging workshops.

- Imaging has been used in the Reconciliation Leadership Certificate Program, the Global Mediation and Reconciliation Service and the Coalition for the Human Right to Peace.
